Sheakley PaySystems Successfully Completes Type 1 SAS 70 Audit *Independent audit certifies PaySystems financial transaction controls*

(March 18, 2009, Cincinnati, OH) Sheakley PaySystems, a premier payroll outsourcing provider, announced it has recently completed a service auditor's review, commonly known as a SAS 70 audit, of its payroll processing services. The audit was performed by a nationally recognized independent auditing firm, and was completed in February, 2009. Included in the scope of the audit were Sheakley PaySystems' new client setup, payroll data input, payroll packaging, direct deposit, tax payment and tax filing processes. The general controls that support these activities were also examined.

"As a payroll provider recognized for our integrity, it is critical for Sheakley PaySystems to have effective controls and the highest standards in place so that our clients are confident we have implemented state-of-the-art security measures to protect their data," said David Massey, Sr. Vice President. "The completion of the SAS 70 Audit distinguishes Sheakley PaySystems as a leader in the industry with our commitment to provide the highest level of service to our clients."

Sheakley PaySystems management recognizes that Sarbanes-Oxley legislation has placed an increased focus on the internal controls of valued business partners. The SAS 70 audit report is designed to provide clients with a certain level of assurance regarding the controls that are maintained by Sheakley PaySystems management. The SAS 70 report addresses all five components of internal control outlined in the Sarbanes-Oxley legislation, namely the control environment, risk assessment activities, control activities, information and communication systems, and monitoring activities. The structure of our report is intuitive and is designed to be incorporated well with our clients' Sarbanes-Oxley compliance programs.
