Sheakley

It's done.

Sheakley, a name synonymous with quality Workers' Compensation, is now offering Workers' Compensation Medical Bill Management services for employers participating in the Ohio Bureau of Workers' Compensation \$15,000.00 Medical Only Program. Let our 45+ years experience help you better manage your workers' compensation medical bills.

Medical Bill Repricing

Sheakley's Proprietary Medical Billing software will:

- Review bill data and adjust the bill to either our PPO Network fee schedule or to the BWC Fee Schedule
- Provide clinical analysis to determine appropriate billing practices
- Review bill for appropriate diagnostic codes
- Review bill for appropriate or duplicate dates of service

Any "questionable" bills identified during the clinical editing are automatically routed to our highly trained medical billing team. This team will perform a manual review of the bill and office notes to ensure proper billing procedures have been utilized by the provider. Sheakley's medical billing team includes nurses and certified coders to provide an additional clinical review when necessary.

Medical Bill Management

Once the bill has been reviewed, Sheakley will generate a duplicate bill statement with the adjusted fee schedule and a report indicating the results of the clinical editing. This statement will provide the actual billed amount, the adjusted amount and any savings. All information will be returned to the employer within one business day of processing to expedite the provider's payment.

Sheakley will send a monthly invoice identifying all bills processed and your total monthly savings.

We'll take the hassle out of managing your own workers' comp medical bills.
