## Workplace Violence Awareness

This course is designed to provide business owners, top management, HR Directors and safety personnel with a general knowledge and understanding of workplace violence. This topic should not be ignored. You never know when and if workplace violence will occur. Workplace Violence is a very important issue that some may consider irrelevant in their environment. Our 2 hour seminar will help raise your awareness of workplace violence and the potential impact it may have on your organization. The session will also provide you with necessary information to begin the development of a Workplace Violence Prevention Program.
