Sheakley...It's Done! List of Safety Services

Let Sheakley Health & Safety Services help you make your workplace safe for your employees. Our consultants have a combined 85 years of experience in training and consulting on various health and safety topics. Here is a list of some of the many safety and health services that Sheakley has to offer you.

Onsite Safety Consultation - Let us be your onsite Safety Department

This consultation will include, but is not limited to onsite safety revisions and improvement recommendations, assistance with implementation of new safety programs, OSHA compliance, training and Safety Team/Committee development.

Customized Safety Walk-Thru

Our consultants will conduct a comprehensive review of your facility to identify areas of potential risk for health and safety, as well as help you evaluate OSHA compliance. Following the "walk-thru", our consultants will provide a detailed report, including recommendations for progress toward a safer workplace.

Complete Drug & Alcohol Program Development

Services include: Drug & Alcohol policy development, consultation, set-up of Drug & Alcohol testing (clinic based and onsite), Employee Education, Supervisor Training and Employee Assistance Program referral.

Evacuation Training

An effective evacuation plan must be well established and practiced prior to an emergency. In this course, our consultants review evacuation/shelter techniques for fires and natural disasters, as well as review your facility-specific Emergency Action Plan. We also include safety marshal and mock emergency training, if desired.

Hazard Communication

This course provides basic chemical risk communication information to employees, including completion of materials safety data sheets (MSDS), container labeling and more. (Meets training requirements for OSHA Standards 29 CFR 1910.1200 and 29 CFR 1926.21(b)(3)).

Lock Out/Tag Out

This class covers the purpose of LOTO, OSHA required LOTO steps and reviews the basics of your company's LOTO program. (Information presented meets training requirements for OSHA Standard 29 CFR 1910.147(c)(7)).

Machine Guarding

This session reviews the importance of machine guarding, situations when not to remove guarding and how to recognize when guarding may be needed.

Personal Protective Equipment

Discuss hazards associated with each job area, hazard assessment requirements and personal protective equipment that would be appropriate for preventing injuries.

Powered Industrial Truck Training

This session provides an overview of safe operating procedures, OSHA requirements and the stability triangle.

Respirators and Respiratory Protection

Employees are trained on the proper use and care of respirators, as well as potential respiratory hazards to which they may be exposed. (This session meets training requirements for OSHA Standard 29 CFR 1910.134(c)(1)).

Workplace Accident Investigation

Thousands of workplace accidents occur every day. In today's workplace it is crucial for organizations to respond quickly to incidents, effectively resolve the situation, and most importantly, implement steps to prevent the event from recurring. This course provides basic accident investigation procedures and describes accident analysis techniques.
