

WHY CHOOSE SHEAKLEY UNICOMP?

Our unique approach turns industry data into personalized managed care solutions

We may be one of the largest Managed Care Organizations (MCOs), but our clients are never just a number to us. We always keep people at the heart of our program. We use reports and various measurements as a guideline for service delivery, but we know at the end of the day, numbers don't help people. People help people.

■ ON-SITE PHYSICAL THERAPY

Sheakley UniComp's aggressive therapy program helps promote both transitional work and onsite therapy, allowing injured workers' to recover while remaining at the jobsite. This options allows your employees the benefit of receiving their physical therapy at work. If an injured worker has not yet returned to work, Sheakley UniComp can even facilitate the physical therapy to be held at the injured worker's residence. This helps your employees receive the treatment they need without the worry or hassle of transportation.

■ CUSTOM INJURY TRENDING REPORTS

Sheakley's unique reporting system immediately identifies injury frequencies and types for employer review. Our specialists will work directly with you to coordinate a safety program to limit or prevent future injuries.

■ PERSONAL INDUSTRY COMPARISONS

This tool allows you to compare your company's claim details with others in the same industry so your personal consultant can help you assess how well you are performing compared to similar companies, instead of comparing you to the statewide averages for all companies.

■ LIGHT DUTY THROUGH NON-PROFITS

Allows your employees to return to work within restrictions outlined by their treating physician via a placement service through Non-Profit Organizations. No need to have a formal job description, we offer access to our Modified Duty Task Lists which takes the worry out of not having to create your own. On top of all this, the service is free.

■ FIELD CASE MANAGEMENT

Sheakley UniComp takes return to work programs to the next level by building an internal RN review to evaluate the need for a Field Case Manager to attend appointments with physicians when progression to return to work is not being observed. By monitoring individual patient progress, clients save on improved productivity and reduced claim costs. Since 2017, around 50% of our cases have resulted in a return to work full or modified duty.

■ YOUR PERSONAL CONSULTANT

Sheakley has Client Relations Managers (CRMs) who act as your personal consultant to help manage workers' compensation issues and ensure you receive all the information you need while being ever mindful of opportunities to keep your premiums as low as possible.

■ GREAT NETWORK DISCOUNTS

We make it a priority to keep costs low, with statewide network discounts up to 20 percent below the BWC fee schedule. As a client, you benefit from more locations and more options to generate the outcomes needed to get injured workers back to work in a safe and timely manner.

■ CUSTOMIZED INJURY POSTERS

We provide critical information to direct injured workers to nearby network providers ensuring they receive the best care at the lowest rates.

With Sheakley, it's done for you.

You don't need averages, you need managed care that's all about you. You need Sheakley UniComp.
